Vision : Conservation of AZE species ensured through actions at AZE sites in Madagascar							
Overall goal of AZE mainstreaming (2019-2023): A process to integrate AZE sites into national and regional plans							
Expected Result 1: By 2023, decision-making entities are aware of the integration of the AZE concept into regional and national plans							
Objective 1: Decision-making entities are sensitized through different means of information							
Strategy 1: Revive the AZE Working Group							
<i>Action 1: Hold regular group meetings</i>	Meeting notes						MEDD, Group Leader
<i>Action 2: Participate in forums, and national / international sharing and exchange</i>	Publications						Group members
Strategy 2: Hold awareness and mainstreaming workshops							
<i>Action 1: Raise awareness of the importance of AZE species</i>	Names of people attending workshops						Group members
<i>Action 2: Contribute to regional, national and international workshops</i>	Posters, Publications						Group members
<i>Action 3: Inculcate AZE values at local population level</i>							Group members
<i>Action 4: Publish research reports as tools for persuasion of decision-making entities</i>	Publications						Group members, MEDD
Expected Result 2: By 2023, AZE action plans are integrated into national plans							
Objective 2: A legal process ensures the integration of the AZE concept into national strategies							
Strategy 1: Awareness / Information about the AZE concept							
<i>Action 1: Hold regional workshops to promote the AZE concept in municipal and regional plans</i>	PCD and PRD include AZE concept						MEDD and members groups
<i>Action 2: Use results from pilot sites as conservation baseline models</i>	Duplicate template at other sites						MEDD and members groups
<i>Action 1: Integrate the AZE concept into communal and regional plans</i>	PCD and PRD include AZE concept						Région, Commune
Strategy 2: Create AZE decrees on sites of international importance							
<i>Action 1: Lobby at the level of state institutions (Senate, National Assembly)</i>	Lobby						MEDD and members groups
<i>Action 2: Prepare a draft AZE decree on sites of international importance</i>	Decree						MEDD and members groups
<i>Action 3: Prepare a draft decree</i>	Decree						MEDD and members groups
Strategy 3: Promote research and scientific studies on species to direct the plan							
<i>Action 1: Research on ecology, biology, ethology and distribution of species, in particular target species</i>	Research Protocols and Reports						Group members
<i>Action 2: Ecological monitoring of target species while assessing the status of target species relative to the level of natural variation.</i>	Scientific ecological monitoring plan and report						Group members
<i>Action 3: Develop an action plan related to research results</i>	Action plan						Group members
<i>Action 4: Foster partnerships with universities and other stakeholders working on research and studies</i>	Partnership Agreement						Group members
